

PANCREATIC CANCER FAMILY HISTORY WORKSHEET

Understanding your family's medical history can help you learn about your risk of pancreatic cancer.

Use the space below to list any family members who have had cancer. Include their relationship to you, the type of cancer, and the age they were diagnosed or passed away.

Relationship	Cancer type	Age at diagnosis

Circle an option below:

Has your parent, brother, sister, or child been diagnosed with pancreatic cancer? Yes No

Has pancreatic cancer been diagnosed in two or more relatives on either your mother's side or your father's side of the family? Yes No

Has anyone in your family been diagnosed with pancreatic cancer before the age of 50? Yes No

Has anyone in your family been diagnosed with more than one type of cancer? Yes No

Does your family have any known genetic conditions, or has anyone tested positive for a gene linked to pancreatic cancer? Yes No

- If yes, what condition or gene? _____

If you answered 'yes' to any of the questions above, it's a good idea to talk to your doctor. They can help you decide if genetic testing for inherited cancer risk might be useful for you. A genetic counselling appointment can offer more information and help with deciding about tests.

The Jreissati Pancreatic Centre can connect you with resources to help you prepare for discussions with your doctor.
